

Alberto Luigi Fasulo

Electrical engineer

Mobile: +41 76 589 06 56 | Email: afasulo@student.ethz.ch

Date of birth: 08.10.2003 | Nationalities: Swiss & Italian

EDUCATION

ETH Zürich

MSc in Electrical Engineering and Information Technology – Control System and ML Specialization

Zürich, Switzerland

2025 - Currently

- Focus on control systems, machine learning, and their applications in advanced automation and robotic systems.

ETH Zürich

BSc in Electrical Engineering and Information Technology – Control System Specialization

Zürich, Switzerland

2022 - 2025

- Completed a rigorous program covering control systems, embedded systems, signal processing, and computer science.

Liceo Cantonale di Lugano 1

High School Diploma – Subject: Biology and Chemistry

Lugano, Switzerland

2018-2022

- Developed a broad academic foundation across mathematics, chemistry, physics and biology.

WORK EXPERIENCE

Teaching Assistant

Assistant for Computer science 1

Zürich, Switzerland

February 2026 – Currently

- Designed and delivered weekly tutorials for a class of 20 students in Computer Science 1
- Supervised exercises and graded programming assignments.

Exam supervisor

Exam supervisor for Computer - Science 1 Course

Zürich, Switzerland

August 2025

- Assisted with exam administration and supervised students during Computer Science 1 examinations.

Teaching Assistant

Assistant for Computer science 1

Zürich, Switzerland

February 2025 – August 2025

- Designed and delivered weekly tutorials for a class of 20 students in Computer Science 1
- Supervised exercises and graded programming assignments.

PROJECT & EXTRACURRICULAR ACTIVITIES

Semester Project

ETH Zürich

Zürich, Switzerland

March 2026 – Currently

- Developing a deep reinforcement learning framework for flexible job-shop scheduling under dynamic production conditions with multi-objective optimization.

Wavvy – Full-Stack Mobile Application (Own Creation)

Personal Project

Zürich, Switzerland

August 2025 – Currently

- Founding and developing a proximity-based social mobile application and implementing the full-stack system for real-time proximity interactions.

Bachelor thesis

ETH Zürich

Zürich, Switzerland

January – June 2025

- Authored a thesis titled "Wi-Body: Towards Ultra-Low Power and High Throughput Wireless Body Area Networks (WBANs)", focusing on innovative solutions to minimize power consumption and enhance data throughput in wearable sensor networks.

Technical Support for Bachelor Thesis Projects (Peer Collaboration)

Personal Project

Zürich, Switzerland

January – June 2024

- Advised mechanical engineering students on electrical system design for their bachelor theses
- Supported high-voltage current management, firmware development, and controller implementation.

High-school graduation project

High-School Project

Lugano, Switzerland

April 2022

- Designed and built a robotic arm controllable via computer and custom web interface.
- Implemented object detection and automated pick-and-place functionality.

SKILLS

Languages: Italian (Native), English (C1–IELTS), German (B2), French (B1)

Programming: C, C++, Python, Assembly, MATLAB/Simulink, Arduino

Engineering: Embedded Systems, Firmware/hardware Development, Circuit Design, Wireless Systems

Tools: LaTeX, MS Office
